Objects

Chapter: Arrays & Objects | Track: JavaScript

Key-value jorhe — asal duniya wangu:

```
let banda = {
  naam: "Usman",
  umar: 22,
  sheher: "Lahore"
};
console.log(banda.naam);  // "Usman"
banda.umar = 23;          // badal sakde
banda.kam = "Developer";  // nawan pa sakde
```

- Key (naam) → value ("Usman")
- banda.naam — dot notation naal access
- Value badal vi sakde, nawan pa vi sakde
