Element labho te badlo

Chapter: DOM Manipulation | Track: JavaScript

JS naal HTML nu hath lao — DOM raahin:

```
<p id="msg">Purana text</p>
<button onclick="badlo()">Badlo</button>

<script>
function badlo() {
  let p = document.getElementById("msg");
  p.textContent = "Nawan text! ";
}
</script>
```

- document.getElementById("msg") — element labho
- .textContent — andar da text badlo
- onclick="badlo()" — click te function chalo

TIP: Yaad rakho: DOM = Document Object Model. JS da HTML naal gall karan da tareeka!
